

Evidence base: 70 reports from 69 trial families

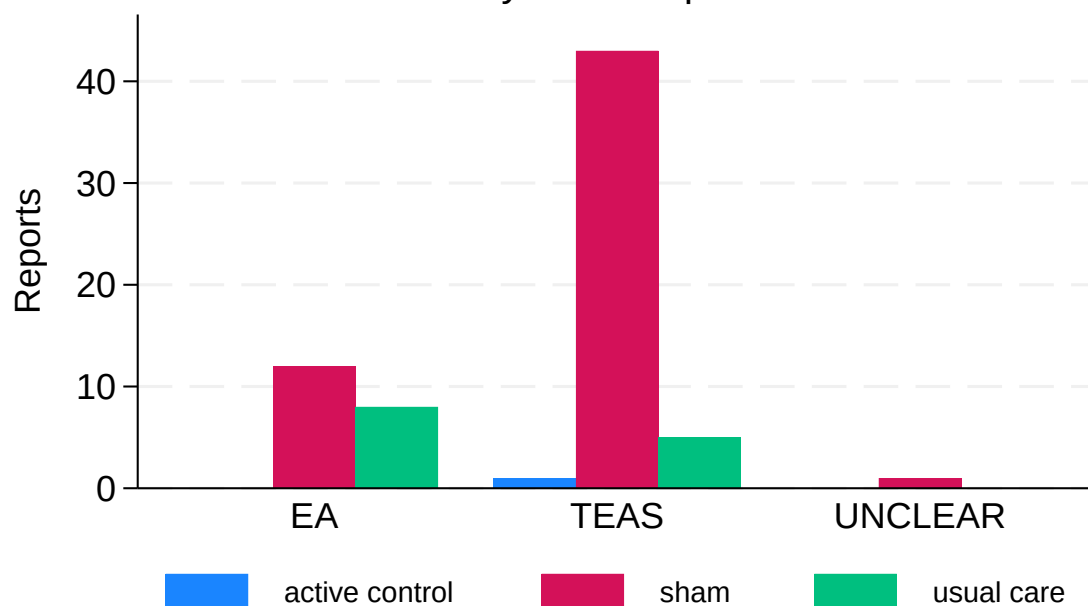

A. Surgical category

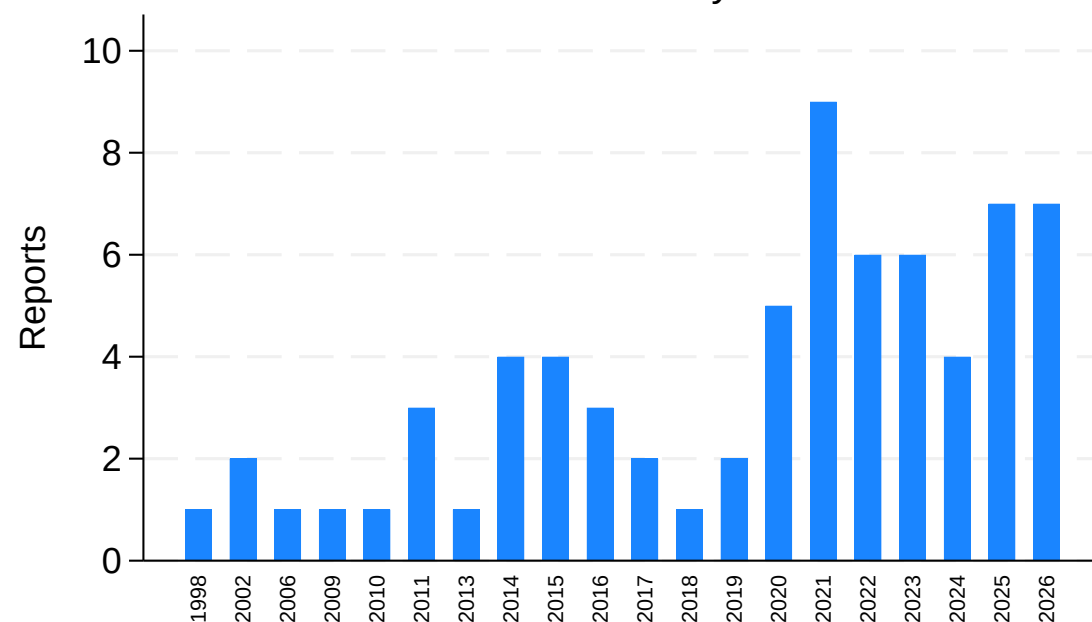

B. Randomised sample size

C. Modality and comparator class

D. Publication year

Counts are reports (70 reports from 69 operational trial families), not independent patients.
Panel C uses study-level comparator labels; result-level comparator classes govern model membership.
Source: 14_CHARACTERISTICS/report_characteristics.csv (harmonised; surgical category source-traced).
